REV. "BILL" A. AG A PASS VISITOR
During the week of special services to be held under the inspiration of Rev. J. Williams Ogden, D.D., Rev. W. T. Young, former Blairmore minister, will spend a week in the Pass as the guest of Rev. A. E. Larko. For some weeks Mr. Young has been planning to visit his many friends here. He will occupy the pulpit on Sunday, April 15th.

Those who have followed with interest Mr. Young's ministry will be delighted to renew their friendship with him. He is a man with a vibrant message which comes from the heart, arising out of his own experiences within recent months.

RRKOSKY — BOVIO

A quiet but interesting wedding was solemnized at St. Anne's Catholic church last Saturday morning, March 17, when Vera, youngest daughter of Mr. and Mrs. John Bovio, of Bellevue, became the bride of Joseph Krkosky, second son of Mr. and Mrs. Joseph Krkosky, of Blairmore.

Low mass was celebrated during the wedding ceremony, at which the Rev. M. A. Harrington officiated. The bride was attended by Miss Irene Lieskovsky, of Blairmore, and the groom was supported by Mr. Tom Kanik, also of Blairmore.

After the ceremony, the bridal party left for the home of the bride's parents, where a delightful wedding breakfast was served to the immediate relatives of the contracting parties.
The happy couple will make their home in Blairmore, where Mr. Krkosky is employed at the Greenhill mine. He is also secretary of the local union of the Mine Workers' Union of Canada and member of the Blairmore Board of School Trustees.

The Clarendon Local Press remarks that Red did not enhance his cause any by the Rev. A. E. Smith sedition case. The public looked upon it as a schoolboy reprisal.

ST. PAT'S ENTERTAINMENT IS MUCH ENJOYED

Members of St. Anne's Parish Dramatic club presented their seventh annual entertainment at the Columbus Club hall last Saturday and Monday evenings. The entertainment included step-dancing, songs, children's polka and a three act comedy, "Finnigan's Fortune."

The comedy was very ably presented by the well balanced cast—Milo Fabro received considerable applause and praise for the able manner in which he portrayed Larry Finnigan, the lovable old Irishman, who comes into a fortune.

Mr. Fabro was ably supported by Miss K. Tompkins as Mrs. Finnigan, Jack Tompkins as Patrice Finnigan's son. Miss M. Ponderlock, playing opposite Mr. Tompkins, characterized the role of Dutch Jake's daughter in love with Patrick. J. Pozzi did creditable work as Dutch Jake, while M. Maniquet ably interpreted the part of Rafferty, Finnigan's friend through thick and thin. The heavy parts of Lady Hannah and Count De Morney were exceedingly well presented by Miss L. Brunetto and George Pire. The comedy was presented by and under the direction of the Rev. M. A. Harrington. Members of the Arcadian orchestra rounded out a well balanced programme by rendering several musical selections between acts.

Those taking part in the little girls' chorus of "The Dear Little Shamrock" were Yvonne Silverhorn, Mary Margatak, Zita Danco, Annie Kubik, Helen Huchala, Elizabeth Giza, Emilia Zuberak, Eileen Mercier, Dorothy Campo, Margaret Yanota, Eleanor Aschacher, Annie Gibes, Mary Kasefor, Agnes Huchala, Mary Marcial and Helen Leuchka.

Girls in children's polka were: Eda Marcial, Helen Galicki, Katy Dobek, Francis Gibes, Eleanor Nicfor, Eda Avoledo, Mary Giza, Annie Schlosser, Annie Galvon, Annie Margatak, Veronica Kubik, Veronien Uhrin, Annie Lach, Josephine Nicfor, Alice Minunzi, Angelina Stella, director, Rosy Campo.

We understand the programme is likely to be reproduced shortly at Pincher Creek, and possibly other points.

WOULD EVEN HIDE BEHIND THE PRESS

Recently the editor of the Okotoks Review received a letter for publication, signed "Unknown." The note accompanying it was also signed "Unknown." The guy is still unknown, and the editor remarks: As long as the writer keeps himself unknown, his communication will also be unknown to the public. We do not propose to pull someone else's chestnuts out of the fire, and if "Unknown" wants his letter published, he will have to forward his name for publication also.

We have something very similar to contend with right here. Almost daily certain individuals will approach us, urging that we publish something against the Red element, but never divulge their sacred names; and next we learn is that they have rushed right back to that Red element to criticize us and ask that we be boycotted.

Once again an informer's writ attempts to deprive a woman of her luck to win \$3500. Ten chances to one, the informant never did do a good turn for anyone. Isn't it time that that particular section of the Criminal Code was repealed, especially now when an effort is being made to legalize sweepstakes in Canada. At any rate, that informer will never again be regarded with respect.

BLAIRMORE PUBLIC LIBRARY Books being placed on the shelves this week are:

"The River," Tristram Tupper; "Hide in the Dark," Frances Noyes Hart; "The Door," Mary Roberts Rhinart; "The Master Mind of Mars," Edgar Rice Burroughs; "Mr. Drex of Monte Carlo," E. Phillips Oppenheim; "Tales of Unrest," Joseph Conrad; "The Big Shot," Frank L. Packard; "The Longer Days," by A. J. "The Big Book of Aeroplanes," G. G. Jackson; "The Oxford Annual for Girls."

The Library hours are—Tuesdays, Thursdays and Saturdays from 7 to 9 p.m. The fees are \$1.00 for residents and \$2.00 for non-residents per year. Unemployed of the Town of Blairmore, wishing to use the library, may call any night the library is open and get a membership card free.

TRUSTED RETAINER IS NABBED AS SAFE COMBINATION PLOTTER

It was with a great deal of sorrow that Julius Bing heard about the death of his old customer, Robert Bartlett, the real estate man.

For many years Mr. Bartlett has been using one of Mr. Bing's burglar-proof safes at his 13021 Kercheval Avenue office, and has always spoken highly of its safety, except on one occasion last August, when \$200 had been stolen.

So when Mr. Bartlett's janitor, Ernest Grimm, trotted into Mr. Bing's salesroom at 1981 Gratiot Ave., bearing a note signed with Mr. Bartlett's name, Mr. Bing was appalled. He knew Grimm as Mr. Bartlett's trusted retainer who had once come down to his office for some keys to the safe.

"Would you please give me the combination to my husband's safe?" it read. "Since his death, I have been unable to find it."

"We certainly shall," Mr. Bing told Grimm. "We'll mail it right away, and where shall we address it to?"

"To 13017 Kercheval, Apartment 19, next door to the office," said Mr. Grimm. Then he trotted out. And then Mr. Bing telephoned Mrs. Bartlett to tell her how sorry he was to hear of a customer's death.

"Dead?" demanded a masculine voice in his receiver. "Who's dead? I'm not dead!"

Detectives hidden about the entrance to 13017 Kercheval Ave. Friday arrested Mr. Grimm when he followed the postman to the mail box of Apartment 19, which has been vacant for several weeks. At police headquarters he admitted taking the \$200 last August, according to Detectives Reno Whitmer and Taylor Trent.

On that occasion, he went to the Bing Safe Co., and borrowed a key to the inner compartment of the safe, police said. Mr. Bartlett had gone home forgetting to twist the combination lock knob to the heavy outer door. Grimm, 43 years old, who lives adjoining the Bartlett office, will be charged with grand larceny in an application for a warrant Saturday, Assistant Prosecutor Gomer Krise said.

(The foregoing story is from a Detroit paper, and the Mr. Bartlett, whose business is referred to, is Robert B. Bartlett, third son of the late Police Inspector Bartlett, of Curling, Newfoundland, and brother of the editor of The Enterprise).

Two memberships in the New York stock exchange sold for \$190,000 each. Since January the first, the price of seats has risen from \$126,000. The advance is attributed to greater increase in trading activity on the exchange, and to the belief that government regulations will make trading in stocks more secure.

VETERAN OF CANADIAN PULPIT COMING TO PASS TOWNS

Rev. J. Williams Ogden, D.D., "Grand Old Man" of the Canadian pulpit and minister of the United church of Canada, is coming to the Pass towns next month to conduct special services. Dr. Ogden is a veteran minister of the Gospel, who is nearing the 80 mark and who has completed 60 years in the ministry of the church, both in England and in this country, coming to Canada about twelve years ago. He has occupied the pulpit for such men as Dr. Campbell Morgan and Dr. J. H. Jowett and on a visit to New York was invited to preach in the pulpit of Rev. Harry Emerson Sossick.

He is as great an artist as he is a preacher, having produced paintings of great merit. He will spend a month in the Pass, with a week each at Coleman, commencing Sunday, April 1st; Blairmore, commencing Sunday, April 8th; Bellevue, commencing Sunday, April 15th; Hillcrest, commencing Sunday, April 22. Further announcement will be made concerning these services. It is likely that the opening Sunday service at Blairmore will be held in the Orpheum theatre. Many who know Dr. Ogden are congratulating the United church ministers of the Pass on having secured so outstanding a man for special service.

THE CITY VS. COUNTRY PRESS

Turning from the city newspapers to any one of the exchanges which come to the editorial desk is like stepping from the slums full of vile odors into an old-fashioned garden, sweet with honeysuckle and the scent of perennial flowers.

The pages of the big dailies are so full of murder, thievery, immorality, the breaking up of homes by infidelity and selfishness that the better news is obscured. One is apt to put the paper aside with a feeling of depression and heartache that the world is so full of such terrible and unhappy things.

Then picking up the papers which record the happenings of the smaller towns around us, one gains renewed faith in life. Here are set forth mostly only those things which uplift a community—the activity of the business men, the church news, the civic good accomplished by the women folk, the happy social gatherings of the people and all the thousand and one little items of interest to townsmen and farmer alike, which make up the simple annals of the great common people of this broad country of ours.

Scandals are seldom published in the country newspapers; but if it does happen that decency demands it, the

uglier details are all omitted or are given a kindly touch, which is widely different from the unfeeling publicity of the city press. No wonder. The offenders may be our neighbors or folks we have rubbed elbows with all our lives. They are to us real human beings, while to the great dailies they are merely grains that are ground out hourly in their new-mill.—Wainwright Star.

CARD OF APPRECIATION

Project 122 East, Bellevue, Mar. 20, 1934.

To W. J. Bartlett, Esq., The Blairmore Enterprise, Blairmore, Alberta.

Dear Sir: It is with every apology that we write this late letter of thanks to you for your kindness in sending us your paper (a number of copies), which I assure you is very much appreciated by all of us; and also the blotting pads.

Again, with very many thanks, I am,

Sincerely yours,

G. W. WELCH.

Agricultural Notes

Many Items of Interest To The Western Farmer

Maize, or Indian corn, a native of the American continent, was grown in China under the name of Imperial grain long before the first white settlers arrived in North America.

Practically all of last year's production of timothy and brome grass seed and most of the alfalfa and sweet clover has been sold by growers in Manitoba.

The total area of Scotland, excluding inland waters, is 19,070,000 acres, of which about one fourth is under crops and permanent grass; one half is "rough grazing" (mountain heathland); and one fourth, deer forest and forests.

According to the Dominion Seed Branch, markets service, red clover and timothy seed growers in Quebec were having a good demand in mid-February, but the badly drifted condition of the rural roads was delaying the movement.

The More Beautiful Canada Campaign, under the auspices of the Canadian Horticultural Committee has been asked to urge the various highway departments of the Dominion to establish a definite policy within their scope in the beautification and adornment of Canada.

Only a small part of the 1933 seed production of clover and grass remains to be sold by growers in southwestern Ontario. In the Rainy River and Kenora districts of north-western Ontario, most of the red clover and alsike seed grown in these districts was sold by the growers in the past month.

The production of wool in the Argentine in the current season (October 1933 to 30th September, 1934) is provisionally estimated at 368,000,000 lbs. (greasy basis). This represents an increase of about 10,000,000 over last season and an advance of 23,000,000 lbs. on the average of the period 1928-1931-32.

It is illegal in French Morocco, after the manner in Canada, for anyone to import, transport for purposes of marketing, to hold for sale, or to sell, or dispose of under the designation of seed wheat, any wheat containing at the time of consignment more than one per cent. of total impurities or more than two per cent. broken grain.

In the estimates of the total value of all descriptions of farm poultry by provinces in Canada in 1933, Ontario topped the list with \$14,587,000 followed by Quebec, \$9,000,000; Saskatchewan, \$4,154,000; Alberta, \$3,080,000; Manitoba, \$2,383,000; British Columbia, \$1,927,000; New Brunswick, \$894,000; Nova Scotia, \$738,000; and P.E.I., \$600,000.

A study of the Rowett Research Institute, Scotland, to determine whether extra protein fed to sheep would be partially utilized as such for the production of extra wool showed there was no significant difference in any of the characters of the wool measured in two groups of sheep. One group was fed 52 per cent. more digestible protein than the other.

Wheat Control Legislation

With the introduction of legislation in the House of Commons at Ottawa, and simultaneously in the legislatures of the three prairie provinces, whereby power is to be taken by the several governments to control the marketing of wheat, a complete reversal in the policy which has hitherto been one of the outstanding features of Canada's development will become effective. Time alone will reveal whether the policy now being adopted is wise or not, but unquestionably the several governments concerned are convinced that it is a necessary step to take at this particular period in our national and economic history.

From the earliest days of the opening of Western Canada to settlement, and following the construction of our first transcontinental railway, it has been the aim of all governments at Ottawa not only to encourage settlement, but through the provision of all necessary services to promote the production of the greatest possible volume of wheat. In the development of these policies the Federal government has been assisted and its efforts supplemented by the Provincial governments in the West. Production was encouraged in all possible ways and by every practicable means. A never ceasing battle against weeds, insect pests, rust, losses from hail, has been waged; new varieties of early ripening grain have been developed in order to increase the area capable of wheat production; the use of good clean seed has been stressed; the credit of the Dominion and the provinces has been utilized to make Western Canada a great wheat producing country.

Under the legislation now before parliament and the legislatures, governments are to take control of wheat sales and marketing in order to restrict the volume of such sales, and to apportion among the farmers the amount each will be permitted to sell in the coming crop year, while the Federal authorities will control the volume of sales and deliveries outside the provinces.

"Control of Marketing of Wheat Acts" of a uniform character submitted to the legislatures of Manitoba, Saskatchewan and Alberta provide for control by license or otherwise of the quantity of wheat which each owner or occupant of land may sell during the crop year 1934-35. This legislation also provides that any wheat sold in the provinces shall be sold and delivered in accordance with the regulations made by the Provincial Boards; allows an interprovincial board to take possession and sell wheat stored in the province; provides power to enter into contracts or agreements of any kind with respect to the purchase, sale, handling, transportation, storage and insurance of wheat and to determine what constitutes delivery or possession.

In a word, the provinces take absolute control over the marketing, purchase and sale, and the handling and transportation of all wheat within their respective provinces, while the Dominion takes control of the sale and deliveries of wheat outside the provinces whether within Canada or to other countries.

This, in substance, is the manner in which it is proposed to implement Canada's undertaking in the International Wheat Agreement negotiated at London last year, rather than to attempt to enforce a definite per centage reduction in the acreage sown to wheat and which might, or might not, depending upon climatic and other conditions, result in a lowered wheat production.

Unquestionably the administration of this new legislation will be difficult. It will call for great tact and discrimination if almost universal criticism of and opposition to it is not to develop. Consideration must be given to those thousands of wheat farmers in the drought stricken areas of the West who have not enjoyed normal crops for several years and many of whom have had no crops at all. If crop conditions are favorable this season they must be allowed full opportunity to rehabilitate themselves. The needs of a farmer with a large family of young children are necessarily greater than those of a farmer having no family, or whose children are now of adult age and can care for themselves. In fact, a hundred and one varying circumstances will arise demanding consideration. Hence, the task of issuing individual licenses fixing the quantity of wheat which each farmer may sell will be a task in itself.

The new legislation is to be effective for one year only, although, of course, it may come up for review prior to its expiration. In view of present world conditions this restrictive legislation may be necessary; governments at all event appear to be convinced that it is necessary. Therefore, despite the many conflicting views which prevail, it would appear to be best that people generally should not only agree to give it a fair trial, but that they should do what lies in their power to make the proposed system operate as efficiently and with as little friction as possible. Let us see what it can accomplish for our farmer producers in the crop year 1934-35.

Saved Many Ships

Woman Was Harbormaster in Wales For 75 Years

On the eve of her hundredth birthday, Mrs. Jane Ellen Jones, harbormaster at Porthllyn, Wales, for 75 years, has died. She lived in an inn, 300 years old, whose front door was washed by high tide, and there at one time she conducted a girls' school, teaching art, needlework, domestic science and music. The inn also served as a lighthouse for she put lamps in the windows as a guide to ships. It is asserted in Wales that in this way Mrs. Jones saved many vessels from disaster.

London's first aviation concert was given recently when a dance band played in a soaring aeroplane equipped with loud speakers.

Russia's Grain Supply

Government Starts Campaign To Avoid Famine In Future

The Soviet government has instituted a campaign to assure Soviet Russia adequate grain supplies this year and avoid future threats of famine. Both party and government officials throughout the union have been ordered carefully to select grain seeds and test for germination before planting. In the past, poor seed has been blamed for huge crop failures, resulting in famine threats in areas where the farmers should be able to produce plenty.

Gold packed in 123 boxes and valued at \$4,250,000 recently arrived in a ship at Plymouth, England, having been sent from Australia and India.

Creating Library Fund

School Teachers At Flin Flin Enlist Support Of Citizens

Plans are underway by teachers of the Flin Flin public and high schools for the creation of a library fund and the purchase of books, as circumstances permit to form the nucleus of a school library, this initial stock to be added to from time to time.

Two years ago the teachers clubbed together and with money out of their own purses bought a piano for the school. In undertaking to provide a library they are this time enlisting the support of citizens.

EXCESS FAT DUE TO RHEUMATISM

One Remedy For The Two Troubles

Having rheumatism so badly that she could scarcely walk, this woman began to put on a load of extra flesh. In a letter just received, she writes: "I had a severe attack of rheumatism in both knees. It was so bad that for three weeks I could not put my feet to the ground. I was also getting terribly fat—through not getting my usual exercise. I started taking Kruschen, and persevered. The fat melted away. I noticed the tonic effect it had; the next that my rheumatism went, and—better than anything—I lost the weight that I am a woman of 50, and when I tell you I do exactly the same work as women half my age without the least difficulty. I think you will understand why I swear by Kruschen Salt and recommend them wherever I go."

The six salts of Kruschen assist the internal organs to throw off each day the wastes and poisons that encumber the system. Then, little by little, that ugly fat goes—slowly, yes, but surely. The rheumatism and headaches disappear. You feel wonderfully healthy, youthful and energetic—more so than ever before in your life.

FREE TRIAL OFFER

If you have never tried Kruschen—try it now at our expense. "GIANT" packages which make it easy for you to take a course of Kruschen are now being offered for the new "GIANT" size. This consists of our regular 75c. bottles together with a 25c. bottle of "GIANT" for about one week. On the trial bottle first, put it to the test. It will go with you as good as back. Your druggists are authorized to return your money immediately and without question. You have tried Kruschen free, at our expense. What could be better? Manufactured by Dr. Griffiths Hughes, Ltd., Manchester, Eng. Retailers: Impactors: McMillan's, Ltd., Toronto.

Alberta Telephones

Zoning Plan To Deal With Rural Lines Is Proposed

Adoption of a zoning line in dealing with the rural telephone lines so that sections would be kept in operation for social service or other purposes, was recommended to the Alberta legislature by Premier Brownlee when speaking on the Dugan resolution demanding inquiry by a house committee into the problems of this public utility, said to have an accrued loss of \$10,000,000.

The premier also announced that the government has already taken steps to select a competent engineer to make a survey of the department with a view to supplying a house committee with required information.

Win Way Into Aero Club

Air-minded women have won their way into the Royal Aero club of London, and have done it vigorously that they are to have a room in the clubhouse where they may entertain their women friends. The campaign was directed by Miss Vera Butler, daughter of a famous balloonist.

Travels On Rails Or Road

The "route-rail" is the latest thing on the French roads. It is hybrid, by means of wheels fitted with pneumatic tyres but also possessing flanges, can travel either on rails or on the road. This new vehicle travels daily from Paris to Lille and back, using both rail and road on the way.

Hardening of the arteries is not as deadly as hardening of the heart.

Thin Wall of Gas

Very Narrow Margin Protects Humans From Sun's "Death Rays"

An eighth of an inch of gas is all that stands between the human race and destruction by "death rays" from the sun, according to Dr. Charles G. Abbot in his annual report to the Smithsonian Institution. This ozone "wall" lies forty miles above the earth in the upper reaches of the stratosphere and is spread through considerable space. But if it were concentrated it would be less than one-eighth of an inch thick. "The ozone absorbs short-wave ultraviolet rays that would blind, blister, and eventually destroy all earthly life if they could penetrate the 'wall,'" declares Dr. Abbot. "The ultra-violet waves known to us as beneficial to health are of a longer wave-length. If the ozone layer were 1/8 inch thick the beneficial rays could not get through either and rickets would be prevalent throughout the earth." The Smithsonian Institution calculates that the heat generated by the sun is equal to that which would be produced by burning 400,000,000,000,000,000,000,000 tons of anthracite coal a year.

Russia's Air Service

Society For Promotion Of Aviation Has Twelve Million Members

The rapid strides which Russia has made in the evolution of its air-plane service has astounded the world. The next war will be fought in the air, and Russia is preparing for all eventualities, whether on the offensive or defensive. Russia is becoming air-minded, airplanes are being universally used, the Gosvokhkh Society for the promotion of aviation having a membership of 12,000,000. They cultivate the spirit of the air, exchange their knowledge and practical experiences, collect large sums of money to present airplanes to the State, and now a giant 120 passenger airplane is being built by public subscription, this is the forerunner of a large air passenger traffic within as well as without Russia.

The new state of the nations total air strength are: France 3,000 war planes; Russia 2,900; United States, 2,826; Japan 2,200, Italy 1,507; Britain, 1,436.

Russia is second in the race. What the British Empire doing?—Quebec Chronicle-Telegraph.

YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS

Wake up your Liver Bile

No Calomel needed When you feel blue, depressed, sour on the world, that's your liver which isn't pouring its bile two pounds of liquid bile into your bowels. Digestion and elimination are being slowed up, food is accumulating and decaying inside you, and making you feel wretched. Move bowels—overcome like winds, oil, mineral water, laxative candy or chewing gum, or cathartics. Get out your liver. Carter's Little Liver Pills is the best one. Purely vegetable. Sure. Ask for them by name. Refuse substitutes. Size at all drug stores.

"Mother," called Tommie from the bathroom, "do my ears belong to my face or my neck?"

"Why do you ask that?" queried his mother.

"Well, you said to wash my neck, and I just wanted to know where to stop," answered the lad.

More than 8,000,000 tons of salt are produced annually in the United States.

The United States produces 43 per cent. of the world output of coal.

for STIFFNESS

Pain of Minard's will subside in your case before you can get up. Rub the sore spot with warm water before you get up.

You'll soon lumber up!

MINARD'S "KING OF PAIN"

MINARD'S "KING OF PAIN"

Smothering Sensations Faint and Dizzy Spells

Those feelings of faintness; those dizzy spells; those all-gone smothering, sinking sensations which come over people, from time to time, are warnings that should not go unheeded. They indicate an extremely weakened condition of the nerves and other vital organs and should be given immediate attention. Those suffering in this way will find in Milburn's H. and N. Pills a remedy with which to regenerate their health, build up their run down system, and bring back their bodily vigor.

Ask your druggist for Milburn's H. and N. Pills.

MILBURN'S HEALTH NERVE PILLS

MINIMUM WAGE LAW IS PROPOSED FOR DOMINION

Ottawa.—A federal minimum wage law, extending from one end of the country to the other, was proposed before the House of Commons by George Mathews, secretary of the British Columbia Retail Merchants' Association.

The Vancouver official told of girls working in hair-dressing establishments for \$3.50 a week, forced to run a part of the shop so as to dodge the provincial wage law. Non-enforcement of eastern laws enabled manufacturers to ship their goods to the Pacific coast and undersell British Columbia producers. The solution was to federalize the law.

From the two extremes of Canada, witnesses appeared before the house committee investigating labor conditions and general business practices. Representing Nova Scotia retail merchants, J. C. Doyle, of Halifax, suggested standardization of goods and prices, a brief for the committee by the English Proprietary Articles Trade Association plan.

When the British Columbian suggested the federal government tax mail order houses, he touched common ground with a brief filed before the committee by the Summerfield, P.E.I., board of trade. It was argued that mail order houses, flooding an area with catalogues, took money away and left behind no taxes for the privilege of doing business.

Pacific coast retailers "feel that no parliament can be conscientious in discharging its responsibilities, that justifies inaction in not taxing mail order houses, simply because changes may be required to be made to the B.N.A. act."

Grocers and butchers of Vancouver have written a brief filed before the committee, suggesting other cities might copy. Among other things, the grocers agreed one-cent sales were detrimental and price cutting to injure competitors, unethical.

British-American Trade

New Move Is Made To Increase Business Between The Two Countries

London.—Richard Washburn Child, President Roosevelt's newly appointed "European trade ambassador," will be received cordially in highest government circles and is expected here, and commercial interests are in his scheduled visit here a new move to increase British-American business.

Pending the outcome of the conversations he will have here, British trade leaders and American interests believe an immediate increase in commerce between the two countries depends largely on stabilization of foreign exchange and easier methods for the sale of British goods in the United States.

The British government, though uncertain as to the various fields Mr. Child will explore, recognizes that a new trade horizon has been brought into view by President Roosevelt's declarations on tariffs and kindred subjects recently.

There is also an indication that the government here intends to rely more in the future on bi-lateral negotiations with other countries for an upturn in British foreign trade.

Travelling Medical Clinic

Winnipeg.—"Travelling" medical clinics to treat children in unorganized territory of Manitoba are to be initiated this year in co-operation with the work of the public health nurse, Hon. R. A. Hoey, minister of health, told the Manitoba legislature in discussing appropriation for the department of health and public welfare.

Race Meetings Legislation

Ottawa.—An amendment to the criminal code which would permit race meetings to be held for 14 days consecutively, on such days as racing is legal, instead of having, as at present, at least 29 days intervening between each seven-day period, was given first reading in the house of commons.

Shortage Of Farm Land

Saskatoon.—A shortage of land for settlement by unemployed Saskatchewan families is seen here as a steady stream of family heads registered for assistance under the Saskatchewan land settlement scheme. Already 375 families have registered.

W. M. H. 2038

Cyclone In Australia

Heavy Loss Of Lives Results From Furious Gale

Brisbane, Australia.—Death and disaster followed in the wake of a cyclone coming off the northern coast of Queensland, the latest count showing 73 persons, mostly natives, either dead or missing; several small towns virtually razed to the ground and property damage exceeding \$500,000.

The storms were appalling in their intensity. Most of the casualties occurred on small vessels caught in their path, and one of the survivors said that the wind was so fierce it was impossible even to wield axes to strip rigging.

Nine pending launches and luggers were either lost or missing. Only three out of 20 persons on one craft survived, and they landed exhausted after battling huge seas in a small boat for many hours. Another lugger capsized without drowning 10 persons on board, others were either wrecked or blown out to sea in a disabled condition.

The storms were most intense in an area between Cairns and Cooktown. A flyer from Cairns went up in a heavy rainstorm in a search for survivors and found a trio on the rocky edge of Cape Tribulation where a few others had also managed to make their way. He dropped supplies pending their return.

Insult Escape

Police Believe Plot Engineered By Criminal Gang

Athens.—Greek police charged that the sensational escape of Samuel Innuil from Athens was engineered by an international criminal gang operating from Roumania.

An Athens lawyer and certain others were placed under arrest after the tracing of a long-distance phone call, which police claimed they had overheard, to Roumania.

Innuil was verifiably reported to have escaped dressed as a woman from under the noses of Athens authorities and to be either hiding in Greece or travelling aboard a northbound express train.

Mrs. Innuil, his absent constant companion during the latter months of his stay in Greece, was declared an undesirable alien and ordered deported from the country after authorities had sought knowledge from her concerning Innuil's plans.

Mrs. Innuil was detained by the police after she had revealed her 74-year-old husband, former Chicago utilities operator, had fled from the apartment where he had lived for 17 months in defiance of attempts to extradite him to the United States.

Rescue U.S. Seamen

British Vessel Succeeds In Saving Lives Of Men Aboard Gunboat

Hong Kong, China.—The 187 men aboard the United States gunboat Fulton when flames enveloped her during a heavy storm were brought safely to this port.

Three of the crew were injured. One suffered smoke in the lungs, another had a broken arm, and the third a broken leg. Their names were not available. The Fulton was on patrol duties against pirates.

Their rescue by H.M.S. Wishart and the British steamer Taiman, was an example of wonderful seamanship, the survivors related.

Commander Todd of the Wishart brought his craft alongside the ill-fated ship at great risk in a heavy sea.

The mishap occurred about 50 miles northeast of Hong Kong, while the Fulton was en route to Foochow, China.

The Fulton was abandoned at 10 p.m., still burning furiously.

No Grant Sought

Ottawa.—A grant of \$4,500 to the United Maritime Fishermen voted in the House of Commons brought sharp criticism from A. W. Neill (Ind., Comox-Alberni) who wanted to know why no grant was paid to any of the British Columbia fishermen's organizations. The reply from Hon. Alfred Durnan, acting minister of fisheries, was that no Pacific coast organization had sought such a grant.

Not Taking Over Park

Prince Albert.—The province of Saskatchewan has no intention of taking over Prince Albert national park, says a letter from Premier J. T. M. Anderson to the local board of trade. The board recently recommended administration of the park remain with the Dominion government.

Restores Minimum Wage

Thousands Of Employees In Ford Plants Will Benefit

Detroit.—The five-dollar-a-day minimum wage, with which Henry Ford started industry in 1914, has come back. He announced that the \$5 minimum had been restored, effective March 13.

Forty-seven thousand of the 70,000 men employed in the Ford company throughout the United States benefited by the increase. They had been receiving \$4 and \$4.40 a day and it was estimated, unofficially, that the raise would add approximately \$6,000,000 to the Ford company's annual payroll.

East Windsor, Ont.—Restoration of the \$5-a-day minimum wage for factory employees in the main plant and branch assembly plants of the Ford Motor Company of Canada, Limited, was announced by Wallace R. Campbell, president.

Start Daring Journey

Mountaineers Plan To Cross Coast Range On Skis

Williams Lake, B.C.—Headed by two well known English Alpinists, Sir Norman J. Watson and Wing Commander E. B. Beauman, a party of daring mountaineers left here March 13 for Tatla lake, from where they will trek into the wilderness in an attempt to cross the towering coast range on skis.

The men arrived here from Vancouver by train. They planned to travel by auto truck to Tatla lake, and they expected the 160-mile journey would occupy at least two days. The skiers were equipped to clear the snow-bound roads to permit passage on the trucks.

GRANTING TITLES IS APPROVED BY VOTE IN HOUSE

Ottawa.—With three members jumping party lines, the House of Commons placed its approval on titles for Canadians.

By a vote of 113 to 94, Conservatives defeated a motion to restrain the prime minister from making further recommendations to the king for titles and honors.

Lining up with the Liberals, Progressives and United Farmers in support of the non-titles motion, sponsored by Humphrey Mitchell, labor member for East Hamilton, were two Ontario Conservatives, George Spotton, North Huron, and I. D. Cotnam, North Renfrew. On the other hand Sir Eugene Forster, Liberal, Rimouski, former deputy minister of national defence, joined the government forces.

In the biggest vote of the session, with pairs unrecognized, the government had one of the smallest, if not the smallest majority since it came into office in 1930. Conservatives have a working majority of 30 over all parties in the house, with one vacancy.

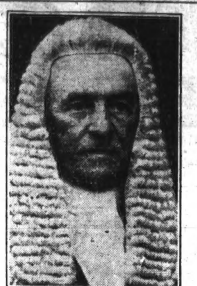

Premier R. B. Bennett defended titles on the ground they were recognition by the state of public services rendered to the country or humanity. Rt. Hon. Mackenzie King, leader of the Liberals, said Canadians generally opposed titles because they established class distinctions that were foreign to a democratic state.

BELGIAN RULERS AT SOLEMN TE DEUM

The first photograph of King Leopold III and Queen Astrid of Belgium since their accession to the throne shows the royal couple leaving the Cathedral of Saint Gudule in Brussels after a solemn Te Deum in their honor. Queen Astrid wears mourning in tribute to the memory of the late king Albert.

NEW APPOINTMENT

Lord Justice Maughan, formerly Hon. Mr. Justice Maughan of the Chancery Division, who succeeds Lord Justice Lawrence, retired, as the new Lord Justice in the British Law Courts.

St. Lawrence Route

Senator Asks For Information Regarding Navigation Conditions And Costs

Ottawa.—Detailed information of a most detailed character respecting navigation conditions, grain rates, elevator services, dredging, ice-breaking facilities and navigation aids, from the head of the lakes to the sea, will be sought from the government by means of an order for return to the senate, by Hon. Archibald Gillis, Saskatchewan.

In notice of motion, Senator Gillis asks for information with respect to the indebtedness of harbor commissions and details of their financial condition, the number and status of grain elevators from the head of the lakes to and including Quebec, dredging costs and details from Montreal to the Gulf of St. Lawrence, the number and cost of ice-breakers operating from the head of the lakes to Sydney, N.S., details of all casualties and fatalities on the St. Lawrence during the fiscal year 1933-34, the value and operating costs of the St. Lawrence river navigation aids in the last 10 years, and wheat freight rates from various points in the prairie provinces in 1933.

Wheat Exports Down

Marked Decrease Shown For Week Ending March 9

Ottawa.—Export clearances of wheat from Canada for the week ending March 9 totalled 1,910,000 bushels, it was stated in a report issued by the Dominion bureau of statistics. Shipments revealed a decrease of more than 1,500,000 bushels when compared with 3,563,933 bushels exported the previous week, and a drop of more than 1,000,000 bushels compared with 3,104,411 bushels during the corresponding week of last year.

Work For School Graduates

Moore Bay.—A resolution by the collegiate board of the city of Edmonton, asking the government to institute a system of public works for graduating high school students, was endorsed by the collegiate board. The board also decided to ask teachers and students for ideas as to what class of works might be undertaken for the benefit of the youth of the city.

Four-Point Arms Plan

France To Make Proposal On Disarmament Question

Paris.—France will propose a four-point arms convention in reply to the recent British disarmament plan. A note now being drafted by the foreign affairs committee, it was learned on reliable authority, will accept an arms treaty, providing that:

First, German storm troops are included in any count of the reich's soldiers.

Second, France will not be asked to disarm immediately if the reich is granted the right to re-arm.

Third, serious guarantees will be given that the convention be carried out faithfully.

Fourth, that the convention be concluded shortly because many countries are already speedily re-arming.

Failing in these reservations, the note hints, it was said, that France will be unable to budge unless Great Britain offers to come to the aid of France in case of attack.

The stubborn Franco-German impasse meanwhile, was not changed by Chancellor Hitler's reply to the latest French note.

French officials said the German leader had "changed nothing" in the situation.

The chamber of deputies foreign affairs committee told Premier Doremerge that the forthcoming note must leave the door open for disarmament.

Emergency Wheat Control

Manitoba Legislature Introduces Measure To Implement London Agreement

Winnipeg.—Legislation to implement the London wheat agreement was introduced in the Manitoba legislature by Premier John Bracken. The measure is identical in essentials to similar legislation brought down in Alberta and Saskatchewan assemblies.

The bill provides for the setting up of emergency wheat control boards with power to license or regulate the sale and purchase of wheat during the crop year August 1 to July 31, 1935.

Immediately following the premier's address, his motion for the bill was approved, the measure received first reading.

ST. LAWRENCE PACT REJECTED BY U. S. SENATE

Washington.—The St. Lawrence waterway treaty, negotiated by the governments of ex-president Herbert Hoover and Prime Minister R. B. Bennett in its present form, was a dead letter for as the United States senate was concerned. Not so at the White House, where even as President Roosevelt admitted the rejection of his request for ratification, he intimated he would reintroduce the measure in some form.

The ultimatum of the treaty was expressed as being "as sure as death." St. Lawrence himself would be built. Mr. Roosevelt himself expressed apprehension that failure of the senate to ratify would place the canal entirely under Canadian control.

The certainty of a channel capable of carrying ocean going freighters from the head of the great lakes to the Atlantic was echoed by Senator Robert La Follette, Progressive-Republican of Wisconsin, one of the leading advocates of the treaty in the senate. After defeat of the measure by a vote of 46 for, 42 against, failing 18 short of the necessary two-thirds, La Follette told newspapermen, "This is just the beginning of the fight."

Senator La Follette represents the attitude of vetoers from the lake states other than Illinois, which has a special interest in Lake Michigan and the diversion of water from the lakes for use in the Chicago drainage canal.

Representing the Illinois attitude, Senator J. Hamilton Lewis, Democrat, a leader against ratification, said the treaty was defeated because it "violated American rights" and insisted "any proposal to send a new treaty to the senate will be of no avail unless it renounces the claim to Lake Michigan as an international lake and admits the amount of diversion to Chicago is to be determined by congress and the state of Illinois."

With these reservations, he said, the treaty would be approved.

WESTERN CADETS CAPTURE EMPIRE RIFLE SHIELD

London.—Sharp-shooting Winnipeg cadets were ranked the finest unit of youthful marksmen in the Empire.

Capturing the senior imperial challenge shield in competition with units from all parts of the Empire, the Cameron Highlanders cadets of Winnipeg helped to swell the all-Canadian scoring per centage to a level sufficient to take the king's trophy for the best "national" team to Canada for the fourth successive year.

Canada was only placed first and second in the senior competition with the Winnipeg cadets and the Hamilton collegiate cadets, but took both junior awards, the Earl Haig sword for the best large junior unit going to the Calgary sea cadets, and the imperial shield for the best small junior team going to the Woodbridge, Ont., public school cadets.

The Canadian "national" entry of 3,000 selected scorers turned in an average of 83 per cent, to take the king's trophy, compared with 79 for South Africa, 73 for Great Britain and 71 for New Zealand.

Australia and the rest failed to qualify for the king's trophy shoot. Altogether 34,000 boys and girls from all over the Empire were in the big shoot.

His Majesty's congratulations of the Canadian achievement were forwarded. Canada has now taken the king's trophy five times now since it was instituted in 1925.

Nudists' Parades

B.C. Member Would Use Drastic Methods To Curb Doukhobors

Victoria.—Release of a hive of hornets, or the use of blacksnake whips by a few hefty provincial policemen would have saved the government thousands of dollars, said C. S. Leary (Lib., Kootenay-Slocan), said in the British Columbia legislature, referring to the 1932 Doukhobor nudist parades in southeastern British Columbia. He was speaking in the budget debate.

"Industry in the Kootenays," he said, "is facing a serious situation because of Doukhobor competition. Originally they came into the province to confine themselves to farming, and were a self-contained community."

"Now they have gone afield and are in ruthless competition with business men of many years' standing. They neither vote, fight nor obey the law. Their standard of living is low and they wish to drag us down to that standard. The time has come when a showdown should be called for. The patience of people in the Kootenays has about reached its limit and the sooner something is done about this unfair competition the sooner we may be in a position to consider costs or other features of an economic recovery plan submitted to the government."

Asks Protection For Growers

Victoria.—G. H. Chatway, on behalf of the Ashcroft Ranchers' Association, charged that "dumping" of low grade Alberta beef in British Columbia had depressed the prices of B. C. beef below the figures profitable to the growers. Mr. Chatway proposed a tax of five cents a pound on all beef, mutton, pork, veal and lamb not raised in British Columbia.

Discussion On Hog Grading

Ottawa.—The advantages of disadvantages to the farmer of hog grading were debated in the agricultural committee of the commons. In every pig market in Canada except Montreal the trading in hogs is done on the basis of the grading by official graders.

Will Stand By Pledges

Victoria.—"This government will not hesitate to be responsible for everything it does and for everything it has pledged itself to, including 'wages and wages,'" declared Premier T. D. Pattullo in the British Columbia legislature.

More Pay For Teachers

Winnipeg.—With the passing of the Winnipeg school board budget for 1934, teachers to-day were assured of a 10 per cent. salary increase effective next October 1.

British Budget

London.—The budget will be introduced in the House of Commons on April 17, Prime Minister Ramsay MacDonald announced.

SCOTT'S EMULSION

SCOTT'S EMULSION

RICH IN VITAMINS

WORLD HAPPENINGS BRIEFLY TOLD

British Columbia will consider a minimum wage for domestic help. Hon. George S. Pearson, minister of labor, has announced.

Closing of government houses in the western provinces as a temporary economy move was suggested in the Alberta legislature by D. M. Duggan, Conservative leader.

The Canadian government has not officially recognized the new state of Manchukuo, the prime minister stated in the house of commons in answer to a question by J. A. Bradette (Lib., North Temiskaming).

Appointment of a board of conciliation to deal with a dispute between the Canadian National telegraph and certain employees in the maritime provinces, was announced by Hon. W. A. Gordon, minister of labor.

A meeting under the auspices of the Ukrainian famine relief committee in Winnipeg was on record as requesting Manitoba government authorities to suppress various orders and organizations supporting Communism.

Travelling medical clinics to treat children in unorganized territory of Manitoba are to be initiated this year in co-operation with the work of the public health nurses, Hon. R. A. Hoey, minister of health, told the Manitoba legislature.

David Kirkwood, Labor member of parliament in Britain, has received 30 or 40 applications from imperial servicemen now living in Canada since he was successful recently in getting a claim by one of them settled by the ministry of pensions.

The advantages or disadvantages to the farmer of hog grading were debated in the agricultural committee of the commons. In every big market in Canada except Montreal the trading in hogs is done on the basis of the grading by official graders.

The heaviest ether shocks ever recorded at Salt Lake City, Utah, rocked cities in north Utah and southern Idaho recently, caused large buildings to sway, cracked the walls of some structures, and also jolted communities in southwestern Wyoming, Nevada and California.

McGill University Benefactor

Montreal Man Leaves Large Sum To Eastern Institution

McGill University will benefit considerably, probably to the extent of more than \$100,000, under the will of the late Dr. John Bowring Lawford, a native of Montreal, who practiced ophthalmic surgery in Harley street.

The estate has been probated at \$315,000. The McGill medical faculty will get \$5,000 to be expended on a library and museum. Another \$50,000 goes to the London Ophthalmic hospital and \$25,000 to the British National Blind Library.

Ultimate residuum is to be divided between McGill and St. Thomas hospital, London.

Macbeth is Shakespeare's shortest play.

Swollen Joints

often are a warning that your kidneys have become deranged and need attention. Don't suffer needlessly. pain. Take Kidney Pills to dislodge and assist your kidneys to function properly.

Little Journeys In Science

CARBON DIOXIDE

(By Gordon H. Guest, M.A.) Carbon dioxide is the gas produced whenever carbon or any of the common fuels, all of which contain carbon, burn in oxygen or air. It is also formed in certain processes such as fermentation and the decay of organic matter. Large quantities also escape from volcanoes and crevices in the earth. It is present in the open air to the extent of about three parts in 10,000. This relatively small amount is essential to the life of all plants and hence it indirectly serves to supply us with our food.

One of the essentials of the life process in animals is the slow combination of the oxygen, taken in by the lungs, with the food which has been consumed. This reaction liberates the heat which keeps the body warm. The products of this body combustion, carbon dioxide and water vapor, are exhaled with each breath.

At first thought it would seem that the constant production of this great amount of carbon dioxide must fill the atmosphere with the gas. The fact is, however, that when pure air in the country is analyzed, it is never found to contain more than three or four parts in 10,000. This is because most plants reverse the process, taking in carbon dioxide and giving off oxygen.

Carbon dioxide is without color or odor and is about 1.5 times as heavy as air. At ordinary temperatures one volume of water dissolves about one volume of gas but under pressure much more will dissolve, a property used in preparing effervescent soft drinks.

It is well known that carbon dioxide escapes through openings in the earth's crust. In a cave near Naples, enough carbon dioxide issues from the cracks in its floor to form a layer from two to three feet deep along the bottom. A man and a small dog walk through the cave, while the dog quickly becomes unconscious, and soon dies if not rescued, the man, whose head is well above the layer of poisonous gas, feels no bad effects. This cave, because of its fatal effect on dogs, is called Grotto del Cane, which means "the cave of the dog".

Proves Old Saying True

Eighty-Six Octogenarians Married In England Last Year

The old saw that proclaims "It is never too late to marry" has been proved by 86 octogenarians who were married in England and Wales in 1933.

According to the registrar-general's statistical review for the year, 81 of the octogenarians were widowers. Of the septuagenarians marrying during the year, 351 were men.

Only one man of more than 90 years took the plunge and he was a widower.

Put Bootleggers To Work

So many bootleggers have been arrested in Finland as the result of new legislation that special barracks for some of them have been built in the Suveva district of central Finland. It will hold 200. The sentenced bootleggers are to be employed in reclaiming marshy and rocky land. The Finnish government recently issued statistics showing that 129,000 gallons of contraband liquor had been seized in the first 11 months of 1933.

Map Built Of Concrete

Possibly the largest relief map in the world exists in Nova Scotia. On the boundary of the two provinces of Nova Scotia and New Brunswick a relief map of Nova Scotia was erected three years ago, and measures 150 feet long and 60 feet high. This relief map is built of concrete, is in generous colors and is illuminated at night by flood lights.

Generates Own Light

Balmy Chinoooks that cut down heating bills this winter entirely eliminated electricity expenses for R. H. Bowne of Windsor Park, Alberta. In Mr. Bowne's back yard a wind-driven lighting plant made from the charging unit of an automobile provides enough current to keep two storage batteries charged for home lighting.

In moving Captain Cook's cottage from Great Ayton, England, to Melbourne, Australia, even the ivy of the walls is being taken to be replanted.

A four-legged sea creature and more than 2,000 fossilized specimens of fish, found in Greenland, have been landed in Copenhagen by Dr. Laue Koch's expedition.

A crab more than 11 feet long was caught recently off the coast of Japan.

Frank W. Reinhold, Chief Farm Manager

Colonization Finance Corporation

Reviewed At Annual Conference Farm managers of the Colonization Finance Corporation and Western managers and inspectors of member companies were present in Winnipeg recently for their annual conference on practical problems of agriculture at the present time. The supervising staff of the Canada Colonization Association was also in attendance.

At the meetings, a paper was read by D. Howard Doane of St. Louis, Mo., on the question of rural appraising, and various problems of farm management were discussed, among them the following: Moisture conservation and soil drifting in areas subject to drought; problems of control and cropping methods to meet the grasshopper situation, methods for controlling couch grass, general problems in the control of wild oats, ways of securing more necessary farm work, land utilization involving the better use of waste land, rotation plans and practices and better use of crop plans, ways of improving water supply, a consideration of the general situation regarding farm machinery and horse power, methods of cutting operating costs and a review of new information regarding the handling of sweet clover. S. E. Todd, secretary of the Canadian Meat Packers, Toronto, outlined fully the marketing procedure necessary to take advantage of the opportunities at present afforded in the British market for the bacon type of hog acceptable there.

The beginning of an organized farm management program, such as the Colonization Finance Corporation has been carrying out for the past four years, dates from a meeting of the Lomax Mortgage and Investment Association held in Montreal, March 28, 1927. Two years of land settlement were the part of the Canadian Colonization Association, a subsidiary of the Canadian Pacific Railway, had clearly demonstrated that more extensive supervision of new settlers was required. This was a greater burden than this organization or individual settler companies could bear, and it was apparent that this could best be done by joint effort. During the first year, the farm management department operated in a very limited manner, having only 25,012 acres in the Province of Manitoba under the supervision of the chief farm manager, assisted by two zone managers. Zones were established that year with headquarters at Winnipeg, Brandon and Dauphin.

In the spring of 1932, operations were extended to Saskatchewan, additional zone headquarters being opened in Battle, Man., and Ashcroft, Yukon, Indian Head, Canada and Weyburn, Sask., with a sub-zone in Winnipeg. At the present time, the Colonization Finance Corporation has under its management 1,441 farms totalling 486,229 acres, with a farm management department consisting of the chief farm manager, 13 zone managers and two assistant zone managers in charge.

Of these farms, about 75 per cent. are operated by the owners, either as mortgagors or purchasers under sales agreements, and only 25 per cent. by tenants. The membership

Large white stripes will be vege for men's suits in London this spring.

Coffee is a native plant of Abyssinia.

The wrestling referee often hears a speech from the thrown, too.

SUNDAY SCHOOL LESSON

MARCH 25

CONFESSING AND FOLLOWING CHRIST

Golden Text: "Thou art the Christ, the Son of the living God." Matthew 16:16.
Lesson: Matthew 16:13-17:27.
Devotional Reading: Isaiah 53:7-12.

Explanations And Comments

"Popular Opinion about Jesus, 16:13, 14. Jesus and his disciples have journeyed almost to Caesarea Philippi when he suddenly turned to them and asked, 'Who do men say that the Son of man is?'"

"Some say John the Baptist." So Herod had said, Mt. 14:2. "Was he so much like John as to revive John's memory?—John, with his defiance of unworthy convention, with his proneness to call a spade a spade, and with his stern and fearful talk of the axe against the fan and the flame. Is there anything of John the Baptist in our portrait of the Christ?" (J. H. Jowett).

"Some say Elijah; and others, Jeremiah, or one of the prophets." In calling Jesus one of the prophets they gave him high tribute, for the prophets were the greatest men their nation had ever seen. Elijah and Jeremiah were very unlike. Elijah was a bold, fearless leader whose spirit blazed against those who halted between two opinions; Jeremiah, not less courageous certainly in the end of the day than Elijah—nay, far more so than he—yet at the beginning certainly a most shrinking, timid man, "the reluctant prophet," as he has been called. In the young Prophet men saw something that remained then now of the thunder tones of the great Elijah, now of the meek accents of the still greater Jeremiah.

Peter's Opinion about Jesus, 16:15, 16. "But who say ye that I am?" Jesus further questioned. And Peter, speaking not for himself alone but as spokesman for the group, assured with conviction, "Thou art the Christ, the Son of the living God."

"In fact, the call of Christ is a call to something like the cheerfulness of the soldier of the trenches. It is a call to a life of external turmoil and internal peace. 'I came not to bring peace but a sword.' 'Take up your cross and follow me.' 'Ye shall be hated.' He that would save his life shall lose it. It is a call to take risks, to risk poverty, unpopularity, humiliation, death. It is a call to follow the way of the cross. But the way of the cross is also the way of peace, the peace of God that shall overcome all understanding; it is a way of freedom from all cares and anxieties, and fears; but not a way of escape from them." (Donald Macgregor).

For what shall a man be profited if he shall gain the whole world, and lose his life? or what shall he give in exchange for his life? Recall that cartoon during the War in England's great comic paper which represented the King of Belgium being addressed by a dark and sinister figure. "You have many towns and much wealth. 'So you have lost everything!' the sneering figure said. 'No! I have lost my noble reply. 'Not my soul!'"

Canada Gets New Fruit

Cross Between Orange And Grapefruit Has Intriguing Flavor

"Should the name of ugly fruit be changed to a more beautiful name?" That is the question bothering certain importers in Montreal at the moment. Meantime, a shipment of 2,500 fine specimens of ugly fruit was landed at Halifax from British Honduras and, aboard the C. Canadian National ship Lady Somers and Cathcart and rushed to the Montreal market. It is a cross between an orange and a grapefruit, importers explain. They predict a great future for it on the Canadian market, because of its especially intriguing flavor.

Government measures are reported to be stimulating business in Germany.

OCCASIONAL WIFE

By EDNA ROBB WEBSTER

Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad. Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and is studying commercial art in the hope of landing an agency job. Others in the story are Avis Werth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. At a party at an exclusive club Peter entertains Camilla's guests with impersonations. When the rest of the members of the party go to a cabaret to continue the party, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Bowman and Weeks, an advertising agency, where Camilla has submitted some of her work, send for her and tell her she has a new account which requires unusual treatment of juvenile art. To Camilla's surprise she learns that the account is that of her foster father's company, which has decided on an extensive campaign to bolster up lagging business. After a conference with Mr. Bowman, Camilla decides to attempt the work. The critics were enthusiastic about her work, and Mr. Weeks offers her a salary of \$50.00 a week to start and a prospect of having it doubled. She goes to keep a dinner for Peter and Peter. She tells Peter of her good fortune in securing employment. Mrs. Hoyt is also informed that Camilla has obtained work and is going to leave the Hoyt household. Avis Werth rents a studio in the building on the floor as Peter, and invites him to have lunch there.

(Now Go On With The Story)

CHAPTER XXXV

After all, what was the harm in accepting Avis' friendly hospitality? She had managed it so that Peter would seem absurd to refuse. His only concern was for time, and she had been about to run to the corner lunch counter for something to eat, anyway.

"On one condition," he warned her, severely.

"Oh, I know what you are going to say, old ambition! I don't want to encourage you to linger after the last

HOW TO FIND OUT IF YOU HAVE ACID STOMACH

HERE ARE THE SIGNS:

Nervousness Frequent Headaches
Nausea Feeling of Weakness
Indigestion Sleeplessness
Loss of Appetite Mouth Acidity
Nausea Sour Stomach
Anti-Insulation

WHAT TO DO FOR IT:

TAKE 3-4 teaspoonfuls of Phillips' Milk of Magnesia in a glass of water every 4 hours. Take 1-2 after meals. Take 1-2 after supper. Take 1-2 after breakfast. Take 1-2 after dinner. Take 1-2 after lunch. Take 1-2 after supper. Take 1-2 after breakfast. Take 1-2 after dinner. Take 1-2 after lunch. Take 1-2 after supper.

If you have Acid Stomach, don't worry about it. Follow the simple directions given above. This small dosage of Phillips' Milk of Magnesia acts of course to neutralize the acids that cause headache, stomach pains and other distress. Try it! You'll feel like a new person.

But—be careful you get genuine Phillips' Milk of Magnesia. The trademark is a trademark. This small dosage of Phillips' Milk of Magnesia acts of course to neutralize the acids that cause headache, stomach pains and other distress. Try it! You'll feel like a new person.

Each tiny tablet is the equivalent of a teaspoonful of Genuine Phillips' Milk of Magnesia.

Phillips' Milk of Magnesia

W. N. U. 2038

culits with gauze jelly were nectar and ambrosia. He ate hungrily and chattered amiably. Avis marked a score on her mental chart.

She would not be so naive as to run a good start by insinuation. The way to make a man believe he wanted a thing, very much was to let it become a pleasant and voluntary habit with him. In other words, to make Peter believe he wanted her companionship and the comfort of her solicitous concern for his welfare, more than anything else, was to allow him to develop a casual habit of accepting them. She would force them upon him gradually while she made him believe he sought them without being aggressive—easily, naturally.

It was she, even, who suggested firmly, when he had done ample justice to the food and was smoking leisurely in a deep armchair. "Isn't it about time you went back to your work, old ambition?"

"Did the whistle blow?" he asked with amused surprise. "I didn't hear it. But you are just right about my getting back to work. You almost made me forget that times waits for no man and opportunity flies."

"Your quotations are all jumbled," Avis laughed. "The food has gone to my head," he apologized. "But, seriously, that's the first decent meal I've had for a week. I hope I didn't eat the glut-ton."

Avis was clever. She did not repeat the same strategies too often. Sometimes, it was just a steaming cup of coffee, handed in to him at the right moment without personal interruption, or an ice drink in the evening when he had stopped work for the day, followed by a friendly goodnight.

For contrast, there were several days at a time when her door was closed and her rooms devoid of human sounds, while she filled social engagements or remained anxiously at home. But she was never absent from the studio long enough to allow Peter's growing sense of loneliness to merge into forgetfulness.

She dabbled with her painting, entertained or just amused herself, striving for patience and a friendly indifference toward Peter. At the same time that she displayed an intense interest in his work and progress.

So subtle was the effect upon Peter that he soon forgot his aversion to an important neighbor, dropped his antagonism toward the Avis Werth of the past when he concluded he had judged too severely, and became so accustomed to her friendly concern for him that he relaxed into his pleasant comfort as he sank wearily and gratefully into one of her cushioned chairs and sipped a refreshing drink at the end of an arduous day.

THE RHYMING OPTIMIST

By Aline Michaelis

INHERITANCE

One grandmother left me a ruby pin,
With a shawl from across the sea
And a chest full of lace so fine and
Tall.

They are frail as man's charity.

And one grandmother left me a
Smiling mouth
And eyes that can see no wrong.
With a heart that is kind and
Warm as the south.

And a spirit attuned to song.

One grandmother left me a house on
A hill
And a name which is old and proud;
The other one gave me a steadfast will
That can never be quelled or cowed.

They were dear old souls and I loved
Them well
In a dutiful grandchild's way;
But the stately house I may have to
Sell.

While the smile on my lips will stay.

Sixty below zero was registered at
Verkovansk, Siberia, in January.

Old Magazine Is Valuable

Contains Complete History of Calgary 46 Years Ago
Handled by countless work-hardened hands, yet carefully placed away so that the next visitor might find something with which to while away the long hours, an old publication of great interest to students of history has been found in a deserted cabin in the Caribou district, eight miles from Barkerville, and brought to Calgary by R. Forster.

How long the magazine lay in the cabin is unknown, but it was published in 1888 and probably was taken into the gold mining district in that year. It gives a complete picture of the Calgary of 46 years ago, mentioning business leaders who are still active in the affairs of the city.

It mentions the first cattle shipment to the United Kingdom in 1888. From this district 1,300 head were sent, but a portion of these were sold in Montreal.

Canada's New Flour Markets

Four new markets were gained by Canadian flour in 1933—France, Portugal, Salvador and Alaska. In 1933 Canadian flour was shipped to 79 external markets in all compared with 75 markets in 1932. The British Empire took 4,318,859 barrels of Canadian wheat flour in 1933 compared with 1,251,545 barrels taken by non-Empire countries.

Classed as "beasts of burden," cows are exempt from the title taxes in England.

Pecan Nut Loaf

2 tablespoons Crown Brand Corn Syrup
1 cup milk
1 pound dates
2 cups white sugar
1 teaspoon Mazaola
2 cups pecan meats
Powdered sugar
Cook the syrup, sugar, Mazaola and milk to the soft ball stage or 240 degrees on the thermometer. It is best to use a deep skillet or saucepan, as the mixture boils high.
Add the stoned dates and stir until they are well mashed.
Stir in the nuts, slightly more or less than the given quantity, remove from fire and beat until stiff. Place in wet napkin and roll into shape. When cold, slice and roll in powdered sugar.

May Buy Ex-Kaiser's Yacht

The University of Vienna is negotiating for the purchase of the ex-Kaiser's yacht Meteor, from which William landed at Tangier in 1905 and nearly started a European war. After the Kaiser's abdication the vessel was acquired by Great Britain.

An Old Landmark

Mount Royal's observatory, lookout and resting place for thousands of tourists at Montreal since it was built 27 years ago, is to be demolished. A new modern structure has already been erected nearby.

China's population now is estimated at about 414,011,000, and is the largest in the world, with that of India next, at 32,986,000, and Russia's third, at 147,000,000.
